OVERVIEW OF RESEARCH INTERESTS

- Theory-informed, community-engaged diet, food systems, and physical activity interventions and dissemination research for obesity and chronic disease prevention (e.g., cardiovascular disease, diabetes, cancer), focusing on rural, low-income, minority, and other at-risk populations.
- Individual, social, and food and physical activity environment factors related to behavior change and maintenance; health disparities and health equity; food insecurity; civic engagement for built environment change interventions; and community capacity building for health promotion.

RESEARCH FUNDING (PENDING)

USDA	Szeszulski (\$10,000,000)
Role: Co-Project Director/Co-Investigator	05/2027–04/2032
<i>Testing Individually and School Tailored Precision Nutrition Approaches to Reducing Metabolic Syndrome Among Youth</i>	
This project will convene a local food systems advisory board to guide mobile app development and farm-to-school implementation while evaluating the effectiveness of individually-tailored versus general nutrition education, school-tailored versus standardized interventions, and farm-to-school implementation support versus no support in improving youths' local food consumption, diet quality, and MetS risk factors.	

USDA Rugh (\$4,486,517)
Role: Co-Project Director/ Co-Investigator 01/2027–12/2031
PLANT-Health: Game-Based Precision Nutrition Education for Chronic Disease Prevention in Grades 1–6
This project will design and test a game-based nutrition education platform that blends agricultural and food systems awareness with personalized, evidence-based behavior change strategies; it will pilot scalable school- and home-based interventions to strengthen nutrition knowledge, motivation, and healthy eating behaviors that support chronic disease prevention.

NIH Seguin-Fowler (\$423,500)
Role: Principal Investigator 12/2026–11/2028
Optimizing Multimethod Measurement of Cancer Prevention Behaviors: A Hierarchical Comparison of Composite Scores Using Community-Level Data from a Randomized Trial in Rural Hispanic Women
This project will evaluate multiple approaches for measuring adherence to cancer prevention recommendations using secondary behavioral and physiological data from rural Hispanic women.

USDA Seguin-Fowler (\$10,000,000)
Role: Project Director/ Principal Investigator 11/2026–10/2031
Harvesting Health: Real Food for Healthy Families & Futures
A randomized controlled trial will evaluate a personalized Healthy Food Kit, healthy pregnancy and postpartum mobile app, and the kit plus app combined intervention compared with usual care among pregnant mother-child dyads in Texas.

USDA Seguin-Fowler (\$10,000,000)
Role: Project Director/ Principal Investigator 11/2026–10/2031
StrongPeople, Healthy Communities: a community-wide intervention promoting healthy eating and active living to support healthy futures
After formative work, a community-randomized controlled trial will evaluate community- and individual-level health and behavior outcomes, as well as cost-benefit effectiveness and process evaluation of a suite of agriculture, gardening, nutrition, physical activity, nature contact, and civic engagement activities in rural underserved Texas communities.

RESEARCH FUNDING (CURRENT)

NIH Seguin-Fowler (\$2,150,742)
Role: Principal Investigator 10/2025–09/2029
Deep in the Heart for Women: A Community-Engaged Intervention Study to Catalyze a Culture of Health in Rural South Texas
The goals of this study are to conduct community engagement and formative research for a cardiovascular disease prevention intervention facilitated by a Community Health Worker and then evaluate intervention effectiveness, maintenance, implementation, and cost-effectiveness via a community-engaged study in a diverse, medically underserved rural county of South Texas.

USDA Rethorst (\$999,323)
Role: Co-Investigator 09/2025–09/2028
StrongPeople Strong Hearts Digital: an Extension-delivered, mobile-app based cardiovascular disease prevention program for at-risk women
The overall objective of this study is to evaluate the effects of a digitally adapted version of the evidence-based StrongPeople Strong Hearts program on health behaviors and outcomes.

USDA Seguin-Fowler (\$1,499,998)
Role: Principal Investigator 02/2025–01/2029
The USDA Nutrition Hub at Texas A&M: Healthy Communities & Nutrition Security for All
The USDA Nutrition Hub at Texas A&M is designed to improve food and nutrition security, reduce diet-related chronic diseases, and improve population health throughout Texas and the United States, through developing and enhancing transdisciplinary collaboration and partnerships, compiling and disseminating precision nutrition resources, and fostering education and training opportunities.

NIH Szeszulski/MacMillan Uribe (\$1,515,000)
Role: Co-Investigator 09/2022–06/2027
Strong Teens for Healthy Schools Change Club: A Civic Engagement Approach to Improving Physical Activity and Healthy Eating Environments
The goal of this program is to engage community stakeholders in the refinement and testing of STHS-CC's effectiveness on individual health outcomes, as well as social and environmental influences.

USDA Seguin-Fowler (\$6,540,835)
Role: Principal Investigator (MPI) 08/2022–07/2027
Integrating Community Nutrition with Improved Pregnancy Outcomes
The Harvesting Health trial will evaluate whether a customized food box improves maternal and child health outcomes during pregnancy and postpartum.

USDA MacMillan Uribe (\$499,953)
Role: Co-Investigator 08/2022–08/2026
The Produce Prescription Program for Healthy Blood Pressure Program To Manage Hypertension Among West Dallas, TX Residents
The goal of this program is to evaluate a produce prescription and health education program on blood pressure management among West Dallas residents with hypertension.

NIH Seguin-Fowler/Perry (\$2,710,058)
Role: Principal Investigator (MPI) 04/2022–06/2026
Rural Libraries Promoting Walking and Walkability in Their Rural Communities
This project aims to conduct a comparative effectiveness study (walking program or walking program plus civic engagement) to examine change in physical activity, cardiovascular fitness, and health outcomes; evaluate physical activity change among residents; and conduct implementation and process evaluation.

NIH Seguin-Fowler (\$3,047,266)
Role: Principal Investigator 07/2019–06/2026
Evaluation of a Civic Engagement Approach to Catalyze Built Environment Change and Promote Healthy Eating and Physical Activity among Rural Residents
This study is evaluating a civic engagement approach to catalyze changes in the local built environment to support healthy eating and active living in rural areas and to measure impact on population health.

RESEARCH FUNDING (COMPLETED)

NIH	Gathright (\$354,251)
Role: Co-Investigator	05/2023–07/2025
<i>Multisite feasibility of BA-HD: An Integrated Depression and Behavioral Risk Factor Reduction Coaching Program Following Acute Coronary Syndrome</i>	
The goal of this study is to evaluate the multisite feasibility and acceptability of a behavioral activation-based treatment targeting depression and multiple CVD related health behaviors.	
AHA	Ayine (\$143,177)
Role: Co-Investigator	04/2023–03/2025
<i>Evaluating and Promoting Parent Engagement in the Healthy School Recognized Campus (HSRC) Initiative</i>	
The goals of this study are to increase parental involvement in school-based health programs and to improve cardiovascular health outcomes among parents.	
NIH	Seguin-Fowler (\$12,120)
Role: Co-Investigator; Subcontract Principal Investigator	10/2022–04/2024
<i>Are Interventions Supporting Physical Activity Modified by the Environment (inSPACE)?</i>	
This project examines whether and which home neighborhood built and social environmental factors affect individuals' response to physical activity interventions.	
American Heart Association	Szeszulski (\$230,536)
Role: Co-Investigator	04/2022–03/2025
<i>Optimizing the impact of the Healthy School Recognized Campus Program on youth's CVD risk factors.</i>	
The objective of this study is to conduct a group randomized factorial trial using the Multiphase Optimization Strategy (MOST) framework to evaluate the impact (i.e., implementation and effectiveness) of three implementation strategies on program implementation and youth's cardiovascular disease risk.	
NIH	Seguin-Fowler (\$329,996)
Role: Co-Investigator; Subcontract Principal Investigator	09/2020–10/2021
<i>Community Engagement Research Alliance Against COVID-19 in Disproportionately Affected Communities (CEAL): COVID-19 Communications Resource Hub to Promote Health Equity for Texans</i>	
The objectives were 1) to conduct critical analysis of COVID-19 related materials (e.g., educational content for community health educators; informational materials for consumers), which were used to populate a web-based repository of COVID-19 products, with attention to serving groups differentially affected by COVID-19 related health disparities, and 2) conduct Clinical Trial Community Navigation (CTCN) trainings, which included culturally and linguistically proficient strategies and materials with respect to health literacy and social determinants of health. Project 5 of the Texas CEAL Consortium.	
Cornell Center for Health Equity	Goodman and Navarro-Millán (\$50,000)
Role: Co-Investigator	09/2018–08/2020
<i>Understanding the Barriers to Care for Blacks with Symptomatic Arthritis</i>	
The objective of this pilot project was to assess barriers to care for arthroplasty for patients who are Black and have advanced arthritis.	

NIH (TRIPLL – Translational Research Institute on Pain in Later Life) Seguin (\$37,813)
 Role: Principal Investigator 06/2018–05/2019
Evaluation of a Flow-Restorative Yoga Intervention to Decrease Pain in Women Aged 60 or Older
 The objective of this pilot study was to evaluate a flow-restorative yoga intervention designed to decrease pain and inflammation among women aged 60 or older.

Cornell University Agricultural Experiment Station Seguin (\$90,000)
 Role: Principal Investigator 10/2017–09/2020
Strong Hearts for New York: Reducing Heart Disease Risk among Rural Women
 The objective of this ancillary study was to examine the relationships between self-reported physical activity and dietary measures with 1) objective measures, 2) audit measures of physical activity and nutrition environments, and 3) dietary and physical activity behavior change in the context of a rural, community-based intervention trial.

Cornell University Agricultural Experiment Station Seguin (\$75,000)
 Role: Principal Investigator 10/2016–09/2019
Expansion of a Civic Engagement Initiative to Encourage Healthy Eating and Activity in Rural Towns: A Web-Based Dissemination of the eHEART Curriculum
 The objective of this project was to adapt the HEART Club curriculum, which provides a stepwise process by which rural residents are empowered to improve healthy eating and physical activity opportunities in their community, into a web-based format (eHEART) for national dissemination.

NIH Seguin-Fowler (\$154,000)
 Role: Co-Investigator; Subcontract Principal Investigator 07/2015–06/2017
Fuerte y Sanas: Adaptation of an Exercise and Nutrition Program for Rural Latinas
 The objective of this study was to adapt, implement, and evaluate an evidence-based exercise and nutrition program that meets the needs of rural Latinas.

USDA Seguin-Fowler (\$4,944,568)
 Role: Principal Investigator 03/2015–03/2021
Innovative Community Supported Agriculture (CSA) Cost-Offset Intervention to Prevent Childhood Obesity and Strengthen Local Agricultural Economies
 The objective of this study was to examine whether cost-offset CSAs coupled with tailored nutrition education improves dietary intake and quality among children aged 2-12 in low-income households.

NIH Seguin (\$1,583,906)
 Role: Principal Investigator 03/2014–02/2019
Strong Hearts, Healthy Communities: A Rural Cardiovascular Disease (CVD) Prevention Program
 This community-randomized trial used a participatory approach in development, implementation, and evaluation of a cardiovascular disease prevention program in medically underserved rural communities.

Boston Nutrition Obesity Research Center Folta (\$20,000)
 Role: Co-Investigator 12/2013–11/2014
Preliminary Investigation of Civic Engagement as a Novel Approach to Behavior Change and Body Weight Improvement in African American Females
 The objective of this study was to examine the impact of built environment focused civic engagement on personal health behavior with urban African American women.

Cornell University Agricultural Experiment Station	Seguin (\$90,000)
Role: Principal Investigator	10/2013–09/2016
<i>Rural Built Environment Assessment Tools (R-BEAT/iCHART)</i>	
The objective of this research project was to develop rural food environment and rural built/physical activity environment tools that are appropriate for use with researchers, health educators, and residents to systematically assess and/or enumerate non-urban community assets.	
Cornell University Agricultural Experiment Station	Seguin (\$81,000)
Role: Principal Investigator	10/2013–09/2016
<i>The HEART Club Project: Encouraging Healthy Eating and Activity in Rural Towns</i>	
The objective was to implement the community-based HEART Club civic engagement curriculum in which extension educators recruited residents to identify and address a nutrition or physical activity environment issue and follow a stepwise approach to develop and evaluate their goals.	
President’s Council of Cornell Women	Seguin (\$2,500)
Role: Principal Investigator	07/2013–06/2014
<i>Neighborhood Environment (Walk Score) and Disease Risk in the Women’s Health Initiative (WHI)</i>	
The objective was to conduct prospective analyses of the relationship between neighborhood built environment and related health behaviors and outcomes such as physical activity and sedentary behavior, body weight status, and development of chronic diseases and cause-specific mortality.	
Bronfenbrenner Center for Translational Research	Seguin (\$12,000)
Role: Principal Investigator	07/2013–06/2014
<i>Translating the Evidence to Build a Community-Level Intervention Framework for Catalyzing Positive Change in Rural Food and Physical Activity Environments</i>	
The objective of this project was to address the gap in knowledge related to rural built environment characteristics by conducting qualitative research with residents in four rural New York towns.	
Institute for the Social Sciences	Seguin (\$12,000)
Role: Principal Investigator	05/2013–04/2014
<i>Examining Relationships between Neighborhood Walkability and Health Outcomes</i>	
The objective of this study was to conduct prospective analyses of the relationship between neighborhood built environment, specifically walkability, and related health behaviors and outcomes by using data from the Women’s Health Initiative (WHI) Study.	
NIH (K01)	Seguin (\$631,875)
Role: Principal Investigator	09/2011–05/2016
<i>The StrongWomen Follow-Up Study</i>	
The objective of this project was to examine personal, social, and built environment factors related to long-term maintenance of weight loss, exercise, and dietary behaviors among overweight and obese female participants in a nationally disseminated community program.	
Centers for Disease Control and Prevention	Nelson (\$1,350,000)
Role: Co-Investigator	09/2009–09/2013
<i>StrongWomen – Healthy Hearts: A Community-Based Program for Midlife and Older Women</i>	
The goal of this project was to study the dissemination of an effective community-based heart health program for midlife and older women using the RE-AIM framework.	

Friedman School of Nutrition Science and Policy, Tufts University
Role: Principal Investigator

Seguin (\$15,000)
06/2006–12/2009

StrongWomen Program Research Project

The goal was to identify leader, participant, and community factors that affected implementation and participation in a nationally disseminated community exercise program.

Fannie E. Rippel Foundation
Role: Co-Investigator

Nelson (\$300,000)
05/2006–09/2008

Promoting Heart Health in Midlife and Older Women

The goal of this randomized controlled trial was to develop and evaluate a comprehensive curriculum for reducing heart disease risk in rural midlife and older women.

The Medical Foundation and Farnsworth Trust
Role: Principal Investigator

Seguin (\$25,000)
06/2005–05/2006

Leaders in Older Adult Community Programs: Roadmap to Policies and Recommendations

The goal was to explore characteristics of public health program leaders, roles of organizations and communities, and environmental factors that influence program implementation and maintenance.

National Aging Blueprint (Robert Wood Johnson Foundation)
Role: Project Manager

Nelson (\$150,000)
04/2004–06/2005

StrongWomen Program: Community Coalition and Dissemination with Cooperative Extension

The project aimed to increase strength training programs for older women in underserved areas through a widespread community coalition and dissemination project with the USDA Cooperative Extension Service.

Ross Aging Initiative
Role: Project Manager

Nelson (\$60,000)
07/2003–06/2004

Health Behavior Change: Impact of Leadership and Community Factors on Program Sustainability

The project goal was to use qualitative and quantitative methods to explore attributes of trained program leaders that predict implementation of a community exercise program for older women.

Centers for Disease Control and Prevention
Role: Project Coordinator and Lead Author

Nelson (\$750,000)
07/1999–06/2002

Growing Stronger: Strength Training for Older Adults

The objective was to develop and disseminate an evidence-based exercise resource that would be affordable, widely available, and intellectually accessible to a broad and diverse range of people.
